

Gain Timely and Comprehensive Management Information with Financial Daily Business Intelligence (DBI)

DARC is a leading Oracle E-Business Suite solutions provider with a demonstrable track record of implementation success. Our consultants the most experienced in the industry, - professionals with real world experience in financial business intelligence, we deliver a blend of knowledge, experience, speed and efficiency that is engaged, executed and applied to your deployment of financial daily business intelligence.

Traditionally, financial information would be distributed to executives and line managers after the close of each period, usually too late for any corrective action to be taken. In today's fast paced business environment, executives and directors need timely, detailed information quickly to support key business decisions across your organization. Oracle Daily Business Intelligence provides a collection of relevant, up-to-the-day information for your reporting needs. Delivered intelligence include: Revenue, Cost of Sales, Operating Expenses, Operating Margin, Actual Expense vs. Forecast or Budget, T&E by head, category cost details, Revenue and Cost information by cost type, source, trend or sales channel.

This information is available daily, in a self-service format. Oracle DBI for Financials can be deployed to several levels of management reaching a much wider audience than traditional solutions. Executives, profit center directors and line managers can see the information they need to manage their responsibilities daily. Managers can see information broken down by individuals who report to them.

KEY FEATURES INCLUDE:

- **Daily Financial Information** – View key information at every level of management. Gauge performance daily with Key Performance Indicators (KPI). Easily understood at a glance graphics.
- **Make Informed Decisions** – View the top ten spenders in your organization. View daily sales to your best customers. Drill into details on your outstanding receivables.
- **Deploy Out-of-the-Box** – Leverage existing GL hierarchies. View information across ledgers. Lower cost reporting with out-of-the-box implementation.
- **Analyze Financial Information** – Analyze revenue and expense information in detail. Perform detailed analysis using several filtering parameters. Analyze financial information against budget or forecast. Observe trends by week, month, quarter and year. Compare performance against previous time periods. Analyze aggregated information and drill into details.

Daily Business Intelligence is the Operational Management Reporting for the Oracle E-Business Suite. Each word in this definition has its meaning and importance.

OPERATIONAL – Means it's an application designed to measure and analyze daily operations' business performance, rather than strategies, according to key performance indicators (KPI).

MANAGEMENT- Targeted at Managers, Directors, Line of Business Heads, and C-Level Executives.

FOR THE E- BUSINESS SUITE- This application is built specifically to sit on top of the Oracle E-Business Suite.

IN ADDITION TO FINANCIAL DBI, OTHER ORACLE BUSINESS INTELLIGENCE OFFERING INCLUDE:
